

Please take a few moments to reflect on your learning in this course. Below are some questions you may use to guide your reflections. You do not need to answer all of them, and you may choose to instead answer different questions not listed here.

The goal of this exercise is two-fold: 1) meta-cognitive reflection both solidifies your own long-term learning, and 2) it is an opportunity to provide feedback to me about what went well in the course and where I should consider adjustments in future semesters.

1. If you were to explain the purpose of this course to a friend who is considering taking it, what would you say? What should they expect to learn?
2. Think back to what you expected this course to be like. In what ways did the course fit your expectations of what you would learn in a Probability course? In what ways did the course surprise you? Are there things you wish you would have learned but didn't?
3. What are you curious to know more about after taking this course? What is one thing that has sparked your curiosity or imagination?
4. What connections have you encountered between this class and other classes? What felt new and unfamiliar?
5. What advice would you give to yourself (or a friend) at the start of the semester about how to succeed in this course? What strategies were helpful or not so helpful?
6. This course was made up of a lot of different components: homework, labs, quizzes, exams, reading annotations, lectures, group work, etc. Which components of the course were most helpful for your learning? Which components did you enjoy the most? Were those the same or different? Why do you think that is?
7. If you were to teach this course, what are 1-2 things you might change to better support student learning?

There is no length requirement. You should not spend an inordinate amount of time on this, but this is more than a 5-minute exercise. I simply request that you take about 30 minutes to an hour to genuinely reflect on the course and convey your thoughts. Most people do this with one or two pages.
